Gynecology Notes	
Gynecology Notes	No. of Pages = 37

Subject Name	Lecture Number	Lecture Content	Lecture Duration	File Size
GYNECOLOGY	Lec 01	<ul style="list-style-type: none"> ♦ Apocrine glands-Hidradenoma of the vulva ♦ Bartholin's gland ♦ Labia minora ♦ Relations of the vagina ♦ Mackenrod't's ligament ♦ Uterosacral ligaments ♦ Uterus ♦ Endometrium ♦ Paarametrium ♦ Uterosacra ligaments ♦ Mackenrod't's ligaments ♦ Pubo-cervical fascia ♦ Ovarian arteries ♦ Uterine artery 	0:40:52	139
	Lec 02	<ul style="list-style-type: none"> ♦ branches of the uterine artery are ♦ Lymphatic System ♦ Round ligaments ♦ Fallopian tubes ♦ Ovaries ♦ Urethra ♦ Ureter ♦ Pelvic diaphragam ♦ Position of the uterus ♦ Pouch of Douglas ♦ Primitive urinary ♦ Normal Hstology ♦ Graafian follicle ♦ Corpus luteum ♦ Corpus albicans 	0:41:03	140
	Lec 03	<ul style="list-style-type: none"> ♦ Secretory phase ♦ Ectopic decidual reaction ♦ Ovarian function ♦ Oestrogen ♦ Inhibin ♦ Andromatistenedione ♦ Arias Stella reaction ♦ Cervical mucus ♦ Preovulatory phase ♦ Human chorionic gonadotropin(HCG) ♦ Prolactin ♦ Oestrogen ♦ Actions of oestrogen 	0:41:40	142
	Lec 04	<ul style="list-style-type: none"> ♦ Progesterone ♦ Actions of progestogens ♦ Follicle stimulating hormone(FSH) ♦ Luteinzing hormone(LH) ♦ Human chorionic gonadotropin(HCG) ♦ Prolactin ♦ Precocious puberty, Menopause ♦ Metrorrhagia, Dysmenorrhoea ♦ Postmenopausal Bleeding ♦ Menorrhagia, Polymenorrhoea ♦ Metropathia haemorrhagica 	0:40:27	138

Subject Name	Lecture Number	Lecture Content	Lecture Duration	File Size
GYNECOLOGY	Lec 05	<ul style="list-style-type: none"> ◆ Dyspareunia ◆ Trichomonas infection ◆ Vaginal moniliasis ◆ Chlamydia trachomatis ◆ Hormonal cytology ◆ Dilatation and curettage ◆ Malformation of the Female Generative organs ◆ Haematocolpos ◆ Mullerian duct anomalies ◆ Uterus didelphys ◆ Uterus bicornis bicollis, Uterus bicornis unicollis ◆ Uterus septus ◆ Hermaphroditism and pseudohermaphroditism ◆ SEX AND INTERSEXUALITY ◆ Turner's Syndrome ◆ Superfemale (triple x chromosome) ◆ Klinefelter's syndrome ◆ Congenital or intrauterine adreno-genital syndrome ◆ Virilising tumor and conditions, Hirsutism 	0:40:39	139
	Lec 06	<ul style="list-style-type: none"> ◆ Condylomata acuminata ◆ Bartholin's Cyst ◆ Trichomoniasis ◆ Candidiasis (moniliasis) ◆ Chlamydia trachomatis ◆ Gardnerella vaginalis ◆ Tumours of the vagina ◆ Gonorrhoea, Syphilis, Chancroid ◆ Lymphogranuloma venereum ◆ Granuloma inguinale ◆ Genital herpes hominis type II ◆ Injuries of the Female genital tract ◆ Vesicovaginal ◆ Rectovaginal fistula ◆ Perineal lacerations ◆ First-degree lacerations ◆ Second-degree lacerations ◆ third-degree tears, Rectovaginal fistula ◆ Lacerations of the cervix 	0:40:23	138
	Lec 07	<ul style="list-style-type: none"> ◆ DISEASES OF THE URINARY SYSTEM ◆ Retention of urine ◆ Space-occupying lesions in the pelvis ◆ Retention of urine due to a retroverted gravid uterus, painful Micturition ◆ Increased frequency of micturition ◆ True incontinence of urine ◆ False or partial incontinence, Urge incontinence ◆ Stress incontinence, Bonney's test ◆ Micturition cysto-urethrography ◆ Surgical Anatomy ◆ Lissosphincter, Rhabdosphincter ◆ Kelly Sutures, CYSTITIS ◆ Marshall, marchetti, Krantz operation ◆ pyelonephritis (pyelitis), Vesicovaginal fistula 	0:40:47	139

Subject Name	Lecture Number	Lecture Content	Lecture Duration	File Size
GYNECOLOGY	Lec 08	<ul style="list-style-type: none"> ◆ Ureterovaginal fistula ◆ Symptoms of urinal fistula ◆ Surgical repair of vesicovaginal fistulate ◆ Ureteric fistula ◆ Ureteric obstruction ◆ Carcinoma of the cervix ◆ Pregnancy ◆ Vesico-uterline fistula ◆ Tuberculosis of the Genital Tract ◆ Tuberculous exosalpingitis 	0:40:32	138
	Lec 09	<ul style="list-style-type: none"> ◆ Pathology of conception ◆ Infertility and sterility ◆ Faults in the male ◆ Semen analysis ◆ Post-coital test(Sims'or Huhner's test ◆ Miller-Kurzrok test ◆ Testicular biopsy ◆ Faults of the Female ◆ Salpingitis ◆ Insufflation ◆ Hysterosalpingography ◆ Laparoscopic chromotubation ◆ Tests for ovulation ◆ Fern testt ◆ Trophoblastic disease ◆ Hydatidiform Mole ◆ Partial mole 	0:40:08	137
	Lec 10	<ul style="list-style-type: none"> ◆ Invasive mole ◆ Complete mole ◆ Persistent trophoblastic tumour ◆ Choriocarcinoma ◆ Fibromyomas Of The Uterus ◆ Hyaline degeneration ◆ Red degeneration ◆ Sarcomatous changes 	0:40:00	136
	Lec 11	<ul style="list-style-type: none"> ◆ Treatment of myomas ◆ Carcinoma of the cervix ◆ Pathology of carcinoma of cervix ◆ Mode of spread 	0:41:06	140
	Lec 12	<ul style="list-style-type: none"> ◆ FIGO ◆ Extended hysterectomy ◆ Radiotherapy ◆ Chemotherapy ◆ OVARIAN TUMOURS ◆ Epidemiology 	0:40:58	140

Subject Name	Lecture Number	Lecture Content	Lecture Duration	File Size
GYNECOLOGY	Lec 13	<ul style="list-style-type: none"> ◆ Common epithelial tumours ◆ Sex-cord(gonadal stromal)tumours ◆ Germ cell tumours ◆ Gonadoblastoma ◆ Serous cystadenoma & cystadenocarcinoma ◆ Mucinous tumours ◆ Endometrioid tumour ◆ Clear cell carcinoma ◆ Brenner tumour ◆ Germ cell tumours ◆ teratoma ◆ Dermoid cysts ◆ Struma ovarii ◆ Carcinoid tumours 	0:21:56	104
	13 Part 2	<ul style="list-style-type: none"> ◆ Endodermal sinus(Yolk sac)tumour ◆ Choriocarcinoma ◆ Embryonal cell carcinoma ◆ Dysgerminoma ◆ Granulosa cell tumour ◆ Theca cell tumour ◆ Arrhenoblastoma ◆ Hilus cell tumour ◆ Ovarian fibroma ◆ Metastatic carcinomas 	0:18:05	50
	Lec 14	<ul style="list-style-type: none"> ◆ Krukenberg tumour ◆ Lymphatic spread ◆ Complications of ovarian tumours ◆ Axial rotation ◆ Repture ◆ Pseudomyxoma of the peritoneum ◆ Infection ◆ Age incidence of ovarian tumours ◆ Malignant ovarian Tumours ◆ Post-menopausal bleeding with ovarian tumours ◆ Staging of carcinoma of the ovary(FIGO) ◆ Treatment of malignant ovarian tumours 	0:41:06	140
	Lec 15 Lec 16	<ul style="list-style-type: none"> ◆ CARCINOMA OF THE ENDOMETRIUM ◆ Aetiology ◆ FIGO staging ◆ Investtigations ◆ Management and prognosis 	0:41:00 0:33:13	140 113
